

Right First Time....and every time.

Training course / Workshop On Good Workmanship of Electrofusion of Polyethylene Piping systems.

Training course Outcome

Upon completion of this workshop, participants should be able to:

- Understand the basic concepts, the “Why’s” and the “How’s” of the PE electrofusion Piping.
- Understand the benefits (including the reliability) of PE electrofused Piping systems.
- Put into practice the correct handling, operation and self-maintaining of the Friamat Electrofusion Machine.
- Improve on the Quality of the PE Piping electrofusion work on site; based on the practical sessions from the workshop provided in the course.
- Understand the standard hydrostatic pressure field test of a completed assembly of PE Piping systems.
- Make a self-assessment on their understanding of the training / workshop through our ‘Questions and Answers’ session.
